Summary

I have been a developer for 3 years with experience in creating and integrating APIs, database modeling, interface design, microservices development, and choosing/implementing system infrastructure using Amazon AWS services. I am extremely curious and creative, with excellent observational skills. This allows me to combine creativity and innovation with quality, depth, and consistency in my work. I am seeking an opportunity where I can contribute my knowledge and innovative ideas. Among my skills, I highlight great autonomy, self-management capability, and proactivity in team environments. I have advanced knowledge in:

NodeJs | Typescript | ReactJs | PHP | Laravel | Clean Code | OOP | Design Patterns | Microsserviços | Docker | AWS

Work Experience

UnicoPag
10/2024 - Present
Mid Level Fullstack Developer

- VueJs, PHP, Laravel, Shopify, Docker, AWS
- Customized and integrated e-commerce platforms like Shopify and WooCommerce, enhancing client solutions.
- Developed integrations with marketing and automation platforms (Klaviyo, Pushcut, UTMify, social media pixels), enabling email/SMS automation, coupon management, personalized notifications, and tracking of product, sales, views, and abandoned carts.
- Implemented Bugsnag and Sentry for monitoring, improving error resolution and performance, reducing response times by 70%.
- Designed custom screens from Figma designs and optimized workflows based on user stories to improve user experience.
- Integrated payment gateways, offering multiple options and ensuring system resilience and fault tolerance.

Saleslights Inc.
09/2024 - 11/2024
Mid Level Fullstack Developer

- Node.js, Typescript, ReactJs, NextJs, Python, Selenium, Web Scraping, Docker, AWS
- Worked in a maintenance environment, addressing numerous bugs and implementing new features to enhance the platform's functionality and performance.
- Led the development of a web scraping tool, taking ownership of architectural decisions, defining its functionality and data structure, and implementing the back-end, front-end, and the scraper itself.

Cartaz Facil
03/2024 - 08/2024
Mid Level Fullstack Developer

- Node.js, Typescript, PHP, Laravel, ETL, Docker, AWS, Digital Ocean, MySQL, postgreSQL, Oracle SQL, MSSQL
- Developed and maintained integrations with APIs and client databases, optimizing communication between systems.
- Applied Clean Code, Clean Architecture, and advanced techniques in query optimization, algorithm analysis, and design patterns.
- Created an efficient integration framework, achieving a 90% reduction in script execution time.
- Implemented new features and resolved bugs for internal and client-facing systems, improving usability and quality.
- Ensured solutions adhered to accessibility standards (WCAG), UI/UX best practices, and SOLID principles.

Kultivi
05/2022 - 12/2023
Back End Developer

- Node.js, NestJs, ReactJs, Docker, PHP, Laravel, AWS, Python, Django, MySQL
- Designed and implemented scalable microservices for an educational platform with 3M+ users.
- Developed new features, enhanced code performance, and optimized CRUD operations and database management.
- Integrated messaging services using Amazon SQS to handle high user volume.
- Collaborated on architectural decisions, feature development, and database modeling.
- Followed Clean Code and SOLID principles to deliver maintainable and high-quality solutions.

Skills

- **Hard Skills :** TypeScript, Python, PHP, SQL, HTML, CSS, Node.js, Nest.js, Django, Flask, Vue.js, React.js, Next.js, Tailwind CSS, AWS, Git, Docker, Design Patterns, SOLID principles, Clean Code, Clean Architecture, Data Structures and Algorithms, WCAG

- **Soft Skills:** Rapid Learning, Excellent Communication, Proactivity, Autonomy, Critical Thinking, Problem Solving, Adaptability

Education

University of São Paulo
Bachelor's degree in Information Systems
2022 - 2025

Federal Technological University of Paraná
Mechanical Technician
2016 - 2019

Ultimate AWS Certified Solutions Architect Associate SAA-C03
(Udemy)

Clean Code e Clean Architecture
(Branas.io)

Tensorflow 2.0: Deep Learning and Artificial Intelligence
(Deep Learning courses)

JavaScript and TypeScript - Basic to Advanced
(Udemy)

Financial Engineering and Artificial Intelligence in Python
(Deep Learning courses)
